🔗 GITHUB

Profile

Full Stack Developer & Computer Engineer Accomplished Full Stack Developer with 1+ years of professional experience delivering scalable web solutions in ERP Solutions and e-commerce platforms. Proven track record in the Saudi market, specializing in **Salla** platform customizations and high-performance applications using **Next.js**, **Node.js**, and **Express** . Expert in bridging the gap between complex engineering logic and modern web architecture to drive business growth for real-world clients.

Education

2018 – 2024	Bachelor of Science (B.Sc.) Electronics & Computer Systems N/A
Khartoum - Sudan	<i>Omdurman Islamic University (OIU)</i>
	Bachelor of Science in Electrical Engineering specialized in Electronics & Computer Systems. Graduated with First-Class Honors. Gained strong foundation in engineering and computing, and led a graduation project involving Python, OpenCV, and YOLO for intelligent face recognition and spoof detection.

Professional Experience

2025 – Present	Software Engineer
remotely	<i>Yaseir</i> 
	• Architected and developed "Wujood," a comprehensive Multi-tenant Employee Management System (EMS) designed to streamline attendance and HR operations for diverse corporate clients. • Engineered scalable Multi-tenancy architectures, ensuring secure data isolation and customized workflows for multiple organizations within a single platform. • Contributed to the development of "Rasayeli," an integrated corporate mailing and communication system, enhancing internal and external organizational connectivity. • Spearheaded the conceptual design and technical roadmap for a unified "All-in-One" business solution (similar to Zoho), integrating multiple service modules to centralize corporate operations. • Tailored digital solutions for the Non-Profit sector, developing integrated brand identities and software tools specifically optimized for NGOs and charitable organizations. • Utilized modern tech stacks (Next.js, Node.js, and Prisma) to build high-performance, responsive dashboards with role-based access control (RBAC).
02/2025 – 06/2025	Full Stack Developer (Next.js & Express.js)
cairo, Egypt	<i>Internship</i>
	Full Stack Developer with experience in the MERN stack, RESTful API development, SQL and NoSQL databases, and application deployment. Familiar with basic system design principles for building scalable and maintainable web applications.
2023 – 2024	AI & Computer Vision Engineer
OIU - Sudan	<i>Bachelor Project</i> 
	Designed and implemented a computer vision system to detect real and fake faces, and integrated the trained model into an attendance management system.

Skills

Frontend ● ● ● ● ● React.js, Next.js, HTML, CSS, JavaScript, TailwindCSS	Backend ● ● ● ● ● Node.js, Next.js, Express.js, (REST APIs , GraphQL)
Databases ● ● ● ● ● SQL & NoSQL : MongoDB, MySQL, SQLite , postgreSQL , ORM : prisma , ODM : mongoose	Tools & Others ● ● ● ● ● Git, GitHub, Postman, Docker, CI/CD tools, deployment tools , AI-assisted coding
Machine Learning / Computer Vision: ● ● ● ● ● Python, OpenCV, YOLO (Ultralytics) model training, MediaPipe, PyTorch (basic)	System Design & Architecture ● ● ● ● ● Diagramming, Database Design & Sizing, Infrastructure Monitoring (Logs & Metrics), Server Capacity Planning (Scale-Up / Scale-Out)

Languages

English	Arabic
Upper-Intermediate	Native

Projects

01/2026 – Present	Wujood ↗ <i>Multi-tenant Attendance System</i> - Developed a SaaS/Multi-tenant platform for automated attendance tracking using Geofencing (Location-based). - Implemented secure data isolation and role-based access control (RBAC) for multiple corporate clients. - Built with Next.js, Prisma, and PostgreSQL, ensuring high scalability and real-time reporting.
01/2026 – 01/2026	Atmosphere ↗ <i>E-commerce Platform</i> - Developed a high-performance custom storefront for a leading Saudi café group using the Salla API. - Integrated Next.js for server-side rendering (SSR) to achieve lightning-fast loading speeds and SEO optimization.
10/2025 – 10/2025	Full Stack E-Commerce ↗ - Developed a complete backend system with authentication, cart operations, product management, and order handling. - Implemented advanced error handling, middleware, and secure routes.
04/2025 – 06/2025	Full Stack LMS Website ↗ Developed a responsive, high-performance LMS featuring secure user authentication, course management, and seamless content delivery for students and administrators. Built with modern technologies to ensure a scalable architecture, optimized performance, and a clean, user-centric interface.
01/2024 – 01/2024	Personal Portfolio ↗ A modern, responsive platform showcasing full-stack and AI projects with optimized performance, interactive media, and a clean user experience.
08/2023 – 09/2023	TITAN Company Website ↗ <i>Modern Frontend Website with Clean UI & Company Portfolio</i> Engineered a high-performance, responsive frontend featuring a modern UI with a professional gallery and well-structured project portfolios. Focused on premium typography, optimized layout, and brand identity to deliver a seamless and visually appealing user experience.

Awards

29/01/2025

First-Class Honors

BSc in Computer Engineer

“Graduated with First-Class Honors in Electronic & Computer Systems Engineering for achieving exceptional academic results and consistent high performance

Interests

Frontend Development Building responsive, user-friendly interfaces, working with React, Next.js, Tailwind CSS, Bootstrap and modern UI/UX practices	Backend Development Designing RESTful APIs (with OData), managing SQL/NoSQL databases, also implementing authentication and authorization, server-side logic, and system performance optimization.	Full-Stack Development Integrating frontend and backend components, deploying web applications, and building scalable, maintainable, end-to-end solutions.
